

Brummana High School  
Upper Elementary

21 May 2019

Dear Parents

We will be introducing Moodle in the upcoming weeks.

Moodle is an open-source virtual environment/ VLE (also known as a learning management system or LMS), which has been developed by educators, for educators. Moodle provides a private and secure learning space for designing online courses with flexible content and collaborative activities for students.

Moodle is accessible online through a link found on the BHS website and from any smart phone using the “Moodle Classic” application. At BHS, students are enrolled automatically in Moodle courses upon the request of their educators. Students therefore can access their courses using their username and password which have already been provided.

Through this communication platform, we hope to further student learning in a more up-to-date manner.

Sincerely

Shatha Abou Khalil  
Head of Elementary Section
